About me

Product Designer with **7 years of experience** and more 3 in development and tech. My technical skills help me work closely with developers and create solutions that are both user-friendly and practical. I am an expert in **Claude Code** and other **AI tools**, and can create full products on my own, while keeping good code quality.

I **doubled an ecommerce final conversion rate** in one year. Also **launched and iterated products** looking for **product market fit and future scale** on startups.
